Dedication

Part Three of Elaytay's Adventures is dedicated to those who like time travel. And to those who have had dreams of a different times or realm that seem real.

Author's notes

Started planning part three of Elaytay in 2001 and knew what I wanted in it. But it took till Feb 3, 2016 before I finally made all of the notes and ideas into words. Meanwhile I had been working on 5 other books.

Table of Contents

Chapter	Title	Pg#
Chapter One	The Sphinx and the Under city	7
Chapter Two	Time out	41
Chapter Three	Prison Planet	55
Chapter Four	Saturn's Pet Problem	87
Chapter Five	Psy Power	105
Chapter Six	Planet of Wee Folk	115
Chapter Seven	Rules to Live by	137
Chapter Eight	Meeting the Jinn	153
Chapter Nine	Fiery Planet	181
Chapter Ten	The Ice Crossing	203
Chapter Eleven	The Shadow Planet	214
Chapter Twelve	The Pyramid Builders	227
Chapter Thirteen	I Knew You Before	235

Elaytay's Adventures in Space and Time

Which Times May be

Chapter One

The Sphinx and the Under city

I have only been back home for a short time, and I was already formulating questions about the new Science of Time Travel.

The idea excited me, and there were so many places I wanted to check out.

Then the big questions came, 'How many lifetimes of information can one gather?

Will we be experiencing time at a faster rhythm than our lives here on our planet?

I mean I wonder if I will experience a few sestrons (days), mistrans (months) or sectos (years) in

say a decon (hour) of our own time.

Surely we wouldn't have to spend the same amount of time, because that would take us away from our own lives here.'

Looking at my timelink, "Oh my, if I don't hurry I will be late meeting up with Enah 2!" I shouted on my way down the stairs.

Strong Bow met me on the main floor.

"Then you had better hurry, Love," he said reaching out to give me a kiss and a huge hug.

"Be safe and hurry home, but have fun this sestron (day)." he added.

My excitement gained momentum as I headed for the Science Center.

This sestron (day) was the first sestron (day) back at the center, and I would be learning the time travel program we now had on our planet.

'I wondered if I could go back in time and manage to save a crew member from our crash on Earth or at least manage to save DNA samples, so they could be cloned.

But I don't think they would be the same because they would only have memories and not the joys and traumas that go with those memories, so I think that would make them different. But maybe I could yell a warning earlier than I did.'

"Good sestron (day)" I said as I opened the large doors, of the science center. I was greeted by Enah 2.

Some things seem to never change.

Enah2 was still dressing the same as Master

Enasto did when he was alive, with the shoulder length hair and the long green vestment.

It was like having an old friend back except for one thing, Enah 2 wasn't programmed to limp.

"Come on in. I have a lot to show you," he said motioning for me to follow him.

I followed him as he showed me machines with two touch screens, and holographic dials, levers and buttons on each panel. Then he opened the door to what he called the time chamber. It looked like a large dome from the inside.

"So tell me how does it all work?" I asked trying to hold back my excitement.

"You see that chair in the center of the room?" he asked, pointing to a chair that looked comfortable enough, except for all of the wires hanging above it.

The wires hooked to what looked to be a very strange helmet.

"Yes," I replied, quickly while looking at it a little closer.

The other ends of the wires were attached to panels, with even more dials, switches, slides, touch screens and buttons.

There were a few more screens with visuals and audio trackers on the next panel.

"It's a little complicated," Enah2 started to explain. "We had a little outside help," he continued.

"Outside help?" I questioned.

"Yes, while you were on your first mission to Earth, we learned a lot about the mind, brain,

consciousness, spirit and dimensions,” he explained.

“So you were learning and working on this from the time I left on my first mission?” I asked clarifying.

“Yes, that is about the time we built our own Creation Domes, and that helps in speeding up our experiments.

With them we are able to make advances by leaps and bounds.

We are now able to see and hear what you see and hear. They also translate the languages so we can understand what is being said,” he explained with a slight smile.

“So this is the same type of domes as on Palids?” I questioned.

“Yes, but there have been advances. In this model we can regulate the time. We can keep the same time as the rest of our planet, let time go faster or slow it down to see how some of the fastest moving things in creation actually work.

We have also found that everything created, is connected, - not only in this space and time, but all of them,” he said, giving the gesture to everything in sight.

“When you say everything created do you mean everything, including things like these machines, buildings, and all,” I said, figuring to rule out a few things.

“Everything that has life and that is naturally made by The Creator’s Creative Force and nature,” he explained.

"We have done some experimenting while you

were off planet and talked to a lot of what others call wise and holy persons.

They pretty much explained it like this," he continued.

"Quote - "Time is continuous and so the past, present and future are only relevant to the perception of the perceiver. Unquote," he related to me.

"What?" I asked before really thinking about what he said.

"Some of our scientist made this machine to help us mentally be conscious and to be aware of other time lines," he continued while looking at me from over one of the machine.

"I think I am on the same page as you," I said, "Are you talking about living on different time lines or different dimensions, at the same time as we are here? Because Papa Two Wolves said it was important to be mindful here but remain aware of other realms and the lessons they teach." I questioned, just to make sure we were talking about the same thing.

"Yes, in a way I am talking about both. We did find out that we can gather experience from other parts of ourselves and history, and I say we loosely, being a sintho (android)," he said with a smile.

"Okay, now that was a little confusing. Are you talking about learning from other realms?" I said looking at Enah2 across the top of the machine in front of me.

"Yes, let me try to explain it this way. We have found out through experiments that self-aware beings are multi-dimensional creatures, and are like a perfectly cut diamond. We have and do exist on many

different levels, worlds, dimensions, time periods, realities, or whatever term you want to use. We are constantly gathering information. All of these areas are held together, by what most are calling Spirit. Some call that part energy, while others call it life force. Haven't you ever been in a situation, needed a solution, and all of a sudden you knew just what to do to help? And you afterwards thinking about the situation had no idea how you knew what to do or where that information came from?" he said pausing.

"Yes," I agreed. 'I'm sure that is what Papa Two Wolves was saying.'

"We are constantly gathering information when we can make that connection to our other parts. For some people making that connection is easier than for others," he explained.

"Okay, so what do these machines have to do with all of that?" I asked.

"We have found that each area has its own vibration. By using varied vibrations, we can pretty much pinpoint the area and time period we want to study more. By finding your core vibration we put that into the machine, and then tell it where and when to place you. Sometimes you will be going consciously, and at other times it will seem physical, all while being hooked up to this wired helmet through the machine. Your focus will be in that area of time, space, dimension or history. Do you understand so far?" he asked.

"I am pretty sure, but I still have a few questions. When I get through with these trips, will I remember all that I have seen or done? And how long will each trip take?" I questioned, "And will they be mental,

conscious, physical, spirit trips or just dream like?"

"That all depends on how
